DETAILED ACTION

The decision by the Board of Patent Appeals and Interferences filed on October 27, 2010, introduced a new ground of rejection, because the claims are based on an abstract idea.

Applicant elected to reopen prosecution and amended claims 133, 134, 153 and 155. However the amendment does not overcome the rejection under 35 U.S.C. 101.

The prosecution is hereby reopened. Applicant also cancelled claims 140-151. Claims 133-139 and 152-159 are currently pending.

The new GROUND OF REJECTION is as set forth below.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 133-139 and 153-159 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Based on Supreme Court precedent, a method/process claim must (1) be tied to another statutory class of invention (such as a particular apparatus) (see at least *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876)) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing (see at least *Gottschalk v. Benson*, 409 U.S. 63, 71 (1972)). A method/process claim that fails to meet one of the above requirements is not in compliance with the statutory requirements of 35 U.S.C. 101 for patent eligible subject matter. Here the claims fails to meet the above requirements because the steps are neither tied to another statutory class

Art Unit: 3622

of invention (such as a particular apparatus) nor physically transform underlying subject matter (such as an article or materials) to a different state or thing.

Although the methods now recite *accessing by a computer a plurality of records*, however accessing information is considered insignificant extra solution activity and can not provide the basis for patentability under 101 *In re Bilski* et al, 88 USPQ 2d 1385 CAFC (2008).

Response to Arguments

Applicant states that independent claims 133 and 153, as amended, satisfy this broad definition and recite neither an abstract idea nor a concept reduced to a mathematical formula. Applicant further states that claims 133 and 153 each recite a ***concrete process for a computer to identify a target consumer and to transmit an advertisement to the targeted consumer.***

Examiner points out that the only step performed by a computer is the step accessing information. As indicated above accessing information by a computer is considered insignificant activity for identifying a consumer and to transmit an advertisement.

As indicated by the Board the rest of the claim can be accomplished by human activity only, including mental processes. Therefore, the claims are rejected as ineligible subject matter under 35 U.S.C. 101.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
